

EXPERTS IN FOOD WASTE MANAGEMENT

FOOD WASTE REDUCTION UNIT COMPACT SYSTEM: SC1

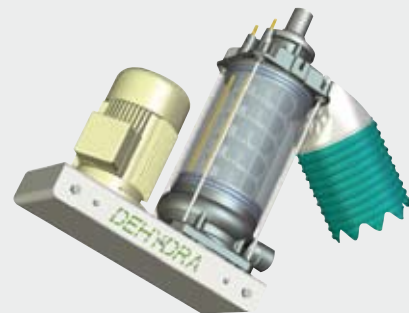

Product Features

The machine is a compact system designed to shred and de-water food waste in commercial kitchens with the following targets:

- to reduce weight, volume and fermentability of food waste
- to minimize the labour cost in the food waste management and waste collection
- to cut down the food waste tax by almost 80%
- to be in compliance with HACCP rules
- to perform a real separate collection of the organic fraction

Product Plus

- Our dewater unit (a self discharging centrifuge) does not required to be daily cleaned
- Water recycling device
- PLC system to ensure an efficient management of the whole working cycle
- Easy maintenance required
- Designed and manufactured in Italy
- Solid construction is stainless steel
- Daily capacity: up to 600 meals per working shift

Electrical and plumbing connections:

- Power supply: 3PH - 400 V - 50 Hz.
- Power input: 3.9 kW
- Socket: 3P+Earth - 16 AMP
- Cold Water: 3/4 or 1/2 connection
- Hot Water: 3/4 or 1/2 connection
- Minimum 2,5 Bar pressure
- Sewage system connection: 50 mm. pipe required
- Overall dimensions: L 700 x W 650 x H 1909 mm.
- Weight: 190 kg.
